

OTMANE AMRANI ZERIFI

Software Engineer

+212689902421  otmanamrani747@gmail.com  <https://portfolio-eight-sage-45.vercel.app>

SKILLS

Programming: C, C++, Python, JavaScript, TypeScript, Shell

Frameworks: Django, FastAPI, Flask, Node.js, React

Databases: PostgreSQL, MongoDB

Tools: Docker, Git, Makefile, GDB, NGINX

Core Strengths: Scalability • Performance • Reliability • APIs • Microservices • Cloud • CI/CD • Testing • Security • Collaboration

PROFESSIONAL EXPERIENCE

Software Engineer — Phenoma Research Platform Aug 2025 (4 months)

- Architected a full-stack scientific research platform with a public portal and a private administrative dashboard.
- Designed a modular, service-oriented architecture using Docker Compose for isolation and maintainability.
- Implemented secure NGINX reverse proxy routing to isolate admin traffic on a private subdomain.
- Built a FastAPI backend with Prisma ORM, improving type safety and database performance.
- Developed a responsive, optimized UI using Tailwind CSS.

Full-Stack Developer – Liadtech (SaaS Team) May 2024 (3 months)

- Delivered full-stack CRM and workflow automation features across multiple environments.
- Improved frontend responsiveness and enhanced API reliability.

Software Engineer — SellnSeal Oct 2024 (6 months)

- Contributed to SaaS development using Django, PostgreSQL, and modern frontend tools.
- Supported system integrations and performance optimizations.

PROJECTS

Vendor Risk Dashboard — React, TS, Vite, Tailwind, CI/CD

Dynamic vendor assessment dashboard with responsive design and optimized performance.

ActevaCRM SaaS — PostgreSQL, Express.js, React, Node

CRM platform with role-based access, analytics-ready backend, and responsive UI.

Real-Time Pong Platform — Django, WebSockets, PostgreSQL

Real-time game platform with live chat, notifications, and analytics.

Inception Infrastructure — Docker, NGINX, Linux

Modular infrastructure containerization with secured routing and service separation.

Education

1337 School (42 Network)

Software Engineering — Low-level C/C++, Systems, Full-Stack Development

Coursera

Coursera — IT Technical Support Fundamentals (2021)
